AKASH SAHA

Hillsborough, NJ | (646)-894-5111 | 1sahakash1@gmail.com | linkedin.com/in/akash-saha5111 | 1sahakash1.base44.app

PROFESSIONAL SUMMARY

Full-Stack Software Engineer and Rutgers Computer Science student with experience building scalable backend systems and integrating LLMs into real-world workflows. Developed production-style web apps using Python and JavaScript. Proven leadership as a U.S. Army Sergeant and Project Engineer Intern, with experience building data pipelines to track complex project metrics and automating workflows to ensure data consistency across large-scale operations.

EDUCATION

RUTGERS UNIVERSITY New Brunswick, NJ
B.S. Computer Science Dec 2022 - Dec 2026

- Focus Areas: Full-stack web development, LLM integration, UI/UX design
- Coursework: Data Structures, Computer Architecture, Machine Learning, Discrete Structures, Data Management for Data Science, Software Engineering, Systems Programming, Software Methodology

PROJECTS

GYM LLM New Brunswick, NJ
AI-Powered Workout Logger Web App May 2025 – Present

- Developed a full-stack web application that utilizes natural language processing to parse and log workout data
- Developed with Python, Flask, and JavaScript, with OAuth and SQLAlchemy for user data management
- Designed fuzzy-matching logic and custom tags to convert user inputs into structured JSON/CSV output
- Integrated Google OAuth 2.0 authentication with secure session management and user-specific workout logging

SCRATCH PAPER New Brunswick, NJ
Note-Taking Browser Productivity Extension Aug 2024 – Present

- Architected a productivity-focused Chrome extension with 50+ active users for persistent, low-latency note-taking
- Developed using HTML, CSS, and JavaScript, ensuring a responsive, lightweight, and intuitive user interface
- Implemented efficient client-side data storage using Chrome Storage APIs enabling data persistence
- Minimized DOM manipulation, improving performance to sub-100ms UI responsiveness

WORK EXPERIENCE

STV Brooklyn, NY
Project Engineer Intern Jun 2025 – Aug 2025

- Managed 1,000+ project assets using e-Builder allowing real-time progress monitoring for a $38.5M NYCHA upgrade
- Streamlined project closeout workflows by standardizing how documentation was organized and reported
- Coordinated technical resolutions for MEP systems by tracking punch list progress alongside Willdan and AKS
- Verified data consistency for final inspections to ensure full regulatory compliance and handover of systems

UNITED STATES ARMY RESERVE Staten Island, NY
Cargo Specialist Jun 2022 – Present

- Executed logistics operations using GATES and ICODES software to process and track 50+ cargo movements
- Directed and trained 11+ personnel on technical loading procedures to optimize the efficiency of vessel operations
- Validated documentation for 400+ vehicle labels, ensuring 100% data accuracy for deployments at major ports
- Maintained operational readiness for a 20+ soldier unit by managing administrative systems and internal workflows

SKILLS & CERTIFICATIONS

Languages: Python, Java, JavaScript, C, C#, R, SQL, HTML/CSS
Technologies: Flask, SQLAlchemy, REST APIs, OAuth 2.0, Git, Linux, Azure.
Tools: AutoCAD, SolidWorks, Technical Drawings, GitHub, REST APIs, OAuth 2.0, E-Builder
Certifications: SST Supervisor (62-Hour), SST Worker (40-Hour), OSHA 30-Hour Construction
